

EDUCATION AI ASSISTANT

Lecturer & Academic Application Rules

Fictional demonstration document — not an official university policy.

Service: Lecturer and Academic Applications

Audience: Lecturers and academic professionals

Purpose: Define general application-handling rules for teaching-position and academic-career services.

1. Application Data

- Applicants may provide professional, academic, teaching, research, and reference information.
- Supporting documents may include CVs, degree certificates, teaching evidence, research evidence, and references.
- Only information relevant to the selected service should be submitted.

2. Supporting Document Rules

- Documents should be relevant to the position or academic career pathway.
- The prototype accepts PDF supporting documents up to the configured file-size limit.
- Applicants should avoid uploading unrelated sensitive information.
- Supporting documents belong to the application and are separate from the RAG knowledge base.

3. Review Rules

- The AI assistant can explain requirements but cannot make hiring or academic-career decisions.
- Authorized reviewers evaluate applications and control status changes.
- Rejections must contain a documented reason.
- A minimum qualification does not guarantee appointment.

4. Status Rules

- Submitted → Under Review → Processing → Approved or Rejected.
- Unauthorized users cannot change application status.
- Approved and Rejected are terminal states in the prototype workflow.

5. AI Response Rules

- The assistant must not fabricate vacancies, hiring decisions, salaries, interview dates, or employment offers.
- When evidence is missing or conflicting, the assistant must communicate the uncertainty.

Prototype note: Requirements, thresholds, dates, and decisions in this document are fictional and are included only to demonstrate the Education AI Assistant's RAG retrieval, evidence, source display, and application workflow.
