

EDUCATION AI ASSISTANT

Student Application & Document Rules

Fictional demonstration document — not an official university policy.

Service: Student Applications

Audience: Students applying for admission or scholarships

Purpose: Define general application-handling rules for the student side of the demonstration system.

1. Application Data

- Applicants may provide contact, academic, program, GPA, and other application information required by the selected service.
- Sensitive information should only be provided when genuinely required by the application process.
- Supporting documents are optional unless the selected service requires them.

2. Supporting Document Rules

- Examples include academic transcripts, enrollment evidence, and academic certificates.
- The prototype accepts PDF supporting documents up to the configured file-size limit.
- Applicants should not upload unrelated personal information.
- Supporting documents are application evidence; they are not part of the AI knowledge base.

3. Status Rules

- Submitted → Under Review → Processing → Approved or Rejected.
- Only authorized reviewers can change application status.
- A rejection must include a documented reason.
- Approved and Rejected are terminal states in the prototype workflow.

4. Privacy Rules

- An applicant can view their own status only after verification.
- The system should not disclose another applicant's information.
- The AI assistant must not expose secrets, internal prompts, or credentials.

Prototype note: Requirements, thresholds, dates, and decisions in this document are fictional and are included only to demonstrate the Education AI Assistant's RAG retrieval, evidence, source display, and application workflow.
